Just What I Wanted for Mother

SOMEWHERE in the "Ryric Gift Book" there is one thing that will make the most satisfactory gift possible for "Mother." Just possible for "Mother." Jus-take your gift list and a "Ryrie" catalogue and spend part of an evening quietly at home. You can go down that list in just a few minutes and opposite each can go cown that not in just a ew minutes and opposite each name, mark the page and num-ber of an article in the "Gift Book," that will suit as nothing

You will pay even less the we may even less than you intended—you will save all the worry and expense of shopping in person—all the worry and expense of parcelling, addressing, stamping, etc. The "Ryrie" guarantee insures absolute satisfaction.

Tea and Coffee Drinking

Tea and Coffee are not foods. Anything not a food which is taken into the system makes the eliminative processes work overtime to throw it off. Often the unprofitable thing, when taken regularly, accumulates faster than it can be eliminated, and becomes a destroyer.

Besides, tea and coffee contains caffeine, a subtle, poisonous drug-from 11/2 to 3 grains to the cup. It is well known that caffeine frequently causes heart trouble, nervousness, sleeplessness and biliousness--serious handicaps to progress and comfort.

If something is hindering your efforts, try the simple test of leaving off tea and coffee ten days and using Postum.

If after a few days you begin to teel bettersleep well, nerves steady up and brain gets clear, you will know how to avoid that trouble.

Postum, made only of prime wheat and a small percentage of New Orleans molasses, is a pure food drink—wholesome, nourishing and delicious. It is absolutely free from caffeine or any other drug.

Postum now comes in two forms.

Regular Postum-must be well boiled to bring out its delightful flavor and food value.

Instant Postum-(the new form) is a soluble powder, A teaspoonful stirred in a cup of hot water makes a delicious beverage instantly. Add sugar and cream to taste.

Views of both sides of the million bushel C.P.R. Concrete Grain Elevator at Trans-cona, Man., which recently settled on its foundations and now stands intact at an angle of 30 degrees.

Concrete Withstands The Severest Tests

IN the San Francisco earthquake and the Ohio floods, concrete structures withstood the terrific tests of fire, water and vibration without damage.

Now, right in our very midst, comes a striking illustration of concrete's enormous power of resistance and durability.

This great concrete structure, built only to resist the pressure of grain from the inside, while filled almost to capacity with 55,000,000 pounds, or 27,500 tons of grain, has settled to an angle of 30 degrees from its original perpendicular position.

In the settling the walls were subjected not only to the reterrific twisting strain of their own weight, but to the weight of thousands of tons of grain as well.

This structure still stands intact and examinations have failed to discover the slightest evidence of collapse.

Not One Dollar of Loss To Owners of Grain

THIS illustration of the ability of conant lesson not only for the farmer, but for business men, contractors, engineers and architects.

Think of the irreparable loss to the owners of the grain, had this elevator been built of some destructible materiala material that would have collapsed almost as soon as the settling commenced, and which would have entailed not only the loss of the building, but almost a total loss of its

We have published a number of books which contain the most complete information and beautiful illustrations of almost every use of Concrete (City and Farm Buildings, Roads and Pavements) for the farmer, builder, business man, manufacturer and everyone interested in a material of such permanence and economy.

These books are free and you may have a copy for the asking—simply state what object you are interested in, on a post card, and send to

Christmas Shopping by Your Own Fireside

THAT is just what shopping from the "Ryrie" Gift Book means.

Wouldn't you like to sit do quietly at home some evening-just like the ladies of an older day did—and have the choicest day did—and have the choicest wares you could possibly imagine displayed before you? Wouldn't you like to sit these quietly, undistuded by other influence, and pick out something for each of your friends; spending to more—no less—than you intended; knowing you could not loss—could not be dissatisfied?

As you turn over the pages of our Gift Book you find dis-played before you, as plainly as if you were in our store, him-dreds of the best possible gifts, gathered from all corners of the world.

Decide NOW Good Roads-

Don't wait until Summer

YOU can't build roads in winter—but what you can do is to decide which roads shall be started next spring. Get an early start so that the roads will be ready for use in summer. If you wait till spring before deciding what to do you will find when late summer and early fall come around, that your roads are still unfinished—and that is the time you need

Outline your road needs now, make investigations into the cost and type of construction, influence public opinion for highways that mean greater economy to every person in your community.

Start right now—get action on the improve-ment of your bad roads—begin the construction as soon as spring opens, and by next summer you will have roads over which you can haul

a full load in less time than you could formerly haul only half a load.

Good Roads (not a makeshift of filling up ruts and mud-holes), besides marking the economic progress of a community, are an important factor in reducing the cost of living and improving the general prosperity. Insist on "good roads"—roads that will stay good for years to come, that kind is cheapest.

Investigate Concrete Roads

THEY are not only the "best good roads," but they are cheapest at the end of ten, fifteen or twenty years. Their first cost is comparatively the same as that of any good road, but their maintenance cost minimizes the original expenditure because the upkeep is practically nothing. This makes concrete the "economy road," and being free from ruts, holes, mud and dust, easy of traction, and open to traffic the year round, makes concrete the "road to

Every citizen owes it to himself, to his family and to his community, to use his influence for good roads because they have a bearing on his everyday life, which is of vital importance to his economic living and future prosperity.

Everyone interested can obtain the fullest infor-mation about Concrete Roads, free, by addressing

THE IN INTELLIGENCER'S FREE DICTIONARI Going Faster Than We Can Get Them Here

We had thought we had fully anticipated the demand that would follow by reason of The Intelligencer's upprecedented offer, and had a supply on hand that we believed would last us the first month. We knew a great many were clipping, but it now appears that everybody is busy cutting out the Ductionary Compon appearing daily on another page. We were forced to wire—before the end of the first week—for an additional 200 by express and a further 1,000 by fast freight. The Intelligence will try to keep you supplied, but there is a limit, of course, to our publisher's capacity. Don't be among the disappointed ones that may later have to wait, a few days.

The Best Yet in Christmas Gifts

SEVENTEEN years ago we insued our first annual Gift Book. A compariwith this year's issue would astound you. Yet the difference, great as it is, is by

no means proportionate to the wonderful change in the volume, scope and efficiency of this business.

This year's Gift Book is the best yet. It will bring right to your door the finest assor-ment of Christmas Gift Jewelry, Silverware, Cut Glass, Watches, etc., ever collected between the covers of one book.

This year's service, too, will be the best yet. Entirely new Mail Order Offices, a staff efficiently organized — these await your commands. You have the privilege of returning anything unsatisfactory. This protects you against any possibility of loss.

THE INTELLIGENCER'S FREE DICTIONARI Going Faster Than We Can Get Them Here

We had shought we had fully anticipated the demand that would follow by reason of The Intelligence's unprecedented offer, and had a supply on hand that we believed would last us the first month. We know a great many were clipping, but it now appears that everybody is busy cutting out the Ductionary Compon appearing daily on another page. We were forced to wire—before the end of the first week—for an additional 200 by express and a further 1,000 by fast freight. The Intelligence will try to keep you supplied, but there is a limit, of course, to our publisher's capacity. Don't be among the disappointed ones that may later have to wait a few days. later have to wait a few days.

THE travelling salesman was face to face with a serious problem.

He had a chance to close a big deal, but in order to do it he would have to go outside his instructions.

A consultation with his firm was absolutely necessary. He called them up on the Bell Long Distance Telephone, outlined the situation and obtained their consent to close the deal.

There are many ways in which the Bell Universal Local and Long Distance Telephone Service is of greatest value to the travelling salesman.

Every Home Has Dozens of Uses for Panshine

How soon will your community replace the mud holes and ruts with a permanent good road?

How soon will you stop filling the ruts and mud holes with your road taxes and build roads that will permit you to put your road taxes into more good roads?

How soon will you discover that permanent good roads increase land values and lessen the cost of living by lessening the cost of

marketing and enabling increased production?

How soon will your roads, that now take the heart and soul out of every man and horse that uses them, be made into a continuous stretch of road that you and every-one in your county will be proud of?

The permanent good road is of vital importance to every community because it has a direct influence for betterment on the everyday life of every person.

Concrete Roads are Permanent

and are the "best good roads." They cost no more to build than any other good road and their upkeep expense is practically nothing, which makes them the cheapest kind of roads.

upacty capacies by Canarde Roads hearst the farmer, the concumer, the merchant, the newspaper, the board of trade, the railroad, and make for greate prosperity generally by increasing had values and production; bringing more trade; more industries; note employment; greate traffic. They decrease the cost of marketing decrease taxation in proportion to increased production, and all of these factors combine to decrease the cost of living

Every citizen owes it to himself to investigate the advantages of concrete roads and learn how they will benefit him directly. This information is free for the asking. Write for it to-day to

THE INTELLIGENCER'S DICTIONA Going Faster Than We Can Get Them Here

We had flought we had fully anticipated the demand that would follow by reason of The Intelligence's unprecedented offer, and had a supply on hand that we believed would last us the first month. We knew a great many were clipping, but it now appears that everybody is busy cutting out the Dictionary Compon appearing daily on another page. We were forced to wire—before the end of the first week—for an additional 200 by express and a further 1,000 by last freight. The finelightence will try to keep you supplied, but there is a limit, of course, to our publisher's capacity, Don't be among the disappointed ones that may later have to wait a few days.

In Planning for Elderly People

ave you ever thought what delightful CHRISTMAS PRESENT a pair of Modern Spectacles or Eye Glasses would make?

Bighty per cent of people over forty years of age are troubled with failing vision. A pair of glasses promptly fetted would be a source of constant pleasure and con-fort to them. Call and learn how the gift can be a sur-prise, and yet have their eyes properly tested.

MicLaughlin- 20 Miles on a Gallon of Gasoline

Buick "Six"

To cut down the cost of operating-to get more mileage per gallon-that's the problem every motorist wants to see solved. Especially pressing is the question in the running of a six-cylinder car—for the average large car simply eats up gasoline.

That is one important point in which the new MeLaughlin-Buick Six excels, We guarantee positively that, carrying 3 passengers, it will tour over ordinary touch using not more than one gallon of gaodine to every 17 miles—and frequent arrund road texts have shown it capable of travelling, 20 miles on a gallon. Think of it—only a gallon of gaodine for a journey of 20 miles of

Then, there's the powerful, efficient "overhead valve" feature—a strong in enabling the McLaughlin-Buick Six to furnish "power with economy."

taterot in enabling lite MeLangklin-Bink's Six to furnish "power with economy."

This hambeum, flexible, silent hig: "Six" will declop more power and de-fiver greater mileage per gallen of fuel than any other car of its size ever offered.

This statement we adsolutely gunrander, and invite comparative tests.

We unhesistatingly place it in competition with the best eras of either for-eign or Américan make, no matter what their price—and as positively assert that if you compare it carefully detail by detail, the SleLaughlin-fluick will prove itself the logical car for your selection.

See it. Test it. Be convinced.

1913 Traffic Census of Concrete Roads in Wayne County, Michigan

This census was taken on the six main thoroughfares, which are built of concrete, leading into Detroit, for seven consecutive days of 24 hours each, in August and September, 1913.

The table shows, for all kinds of vehicles, a gross total of 97,000, of which 33,835, or 35 per cent., were horse drawn, and 63,165, or 65 per cent., were power driven.

These figures indicate that the concrete road has the ability to stand up, without serious disintegration, under the terrific strain of a great amount of traffic on the Country Road, which equals, if not exceeds, the amount of traffic per foot of width, on many city streets. These figures indicate that, in proportion to population, the farmer is benefited to as great an extent as the city dweller.

Here is a paragraph taken from the Wayne County Road Commissioners' report:

"With the completion of Plymouth Road, we have abandoned every other form of construction and have adopted concrete as our standard. We feel that our experience of the past six years warrants us in arriving at this determination, based on its general satisfactoriness and its annual cost as compared with other forms of construction. In addition to the economy in hauling, the pleasure in driving and touring, and the increase in land valuation, the concrete roads of Wayne County have been the means of bringing tens of thousands of dollars to this locality."

Concrete roads will benefit any locality proportionately as they have benefited . Wayne County, Michigan.

The fullest detailed information about concrete roads will be sent to anyone interested, without cost or obligation. Address

"Peace on earth, good will to men!
They sang in holy Bethlehem,
And angel hosts the tidings hore.
Where shepherds warehed on low
And choing wide the joyous song,
Comes rolling down the centuries

The tender form of angel nate; High o'enhead as he smiling lies, Beams a glorious star in darkling skies; While low at his feet kneel sages hoar, From the East afar, and worship him.

"Peace on earth, good will to men?"

Not as a conqueror came he then;
Not as the consideration of spear or shield,
Nor aught of earthly power to wield;
Nor sought with rank, or wealth, or fame.
The homoge of the world to claim.

To heal and to snothe, to help and to sale.

To rob of their terrors, death and the keasy;
Patien and gentle, holy and pure.

Sin and temptation strong to endure;
Finderly pleading in access of love,
Teaching the way to his kingdom above.

"Peace on earth, good will toward men!" Now heard afar, yet still the same; Still der the earth, of et the heaving deep, Those angel hosts their waterles keep; ligh o'erhead, nor dulled nor dim. Still hearns the "Star of Bethlehem!"

When wide around, on sea and tand, Shall rest Jehowah's angry hand; Where war and pestilence hold sway, Shall it turn the darkness into lasting day; And clear above the tumult shall be heard as "Peace on earth, good will toward men!"

In old days there were only two panishments for the soldier—the lash or the gallows. It was a barbarous system, but the one that followed it was little better. When flogging was abolished in the Army and punish-

as well as works of instruction.

The day in a military prison is at least as long and perhaps rather fuller than is an ordinary control pison. It begins at six in the mortile, and what haves cell cleaning, delil, work, and meals, a prisoner has no leisure until sight in the evening. Then he has an hour to binned it of the day o

The star of this and other military, prisons is purely military, the gover-nor is an efficer, and the prisoner is acrer allowed to forget that—although in disgrace—he is still a soldier.

EVENING CLOTHES

The Season for Full Dress Suits and other Outfitting is now on.

We are showing the sort of Dress Clothes that are ap-proved by good form.

The most expert designers planned them—men that are awake to every change of fashion.

The man who comes here to buy his Dress Suit need have no fear that he will be behind the times, or too far in front, as to style.

And he can come in a hurry, too, and be certain of being properly fitted.

The Materials, Trimmings and Tailoring are perfect. We ensure a satisfactory fit, good service and a great saving of the Custom Tailor's

Dress Shirts, Ties, Gloves, Collars, and everything in Full Dress Haberdashery absolutely correct.

The stylish appearance of these jellies will win the admiration of your guests at the tea hour. And when they taste them they will be eager to get your recipes.

Thee jellies are only three of the many kinds, both plain and fancy; which you can make with Shirriff's Jelly Powder. There are recipes inside of every package. There recipes have been tested by an authority in Domestic Science Cookery

connected with a Government School. Many are out of the ordinary. All are worth trying.

Shirriff's Jellies are high-class, pure-food products. There are over a dozen "fruity" flavors. Many women like them so well they buy from a half-dozen to a dozen packages at a time. Six packages cost but 60 cents—815 cents a package. Very little to pay your grocer for a dessert so delicious.

are made from ripe, fresh fruits. You can tell that by the taste. Therichchocolate coating is pure—you can tell that by the crisp "snap" when you bite it—a sure sign of purity.

For the extra occasion that demands something out of the ordinary, you'll find Willard's to be exactly what you need. Packed in handsome boxes tied with ribbon.
